

REASON 3: PERFORMANCE

BREVANT
seeds

WE'RE READY TO GO BUSHEL TO BUSHEL WITH ANYONE.

None of what we're saying would make a lick of difference if we weren't bringing the yield. And from year one, that's what we've been doing. Our last three product classes have proven our performance advantage, and we're not slowing down.

SHOW ME THE NUMBERS

The 2023 class of Brevant® brand corn averages **+9.3 BU/A MORE** than the competition.¹

The 2023 class of Brevant brand Enlist E3® soybeans averages **+1.6 BU/A OVER** first-generation Enlist E3 soybeans.²

QROME®

Brevant brand Qrome® products average **+7.8 BU/A MORE** than the competition across all trait platforms.³

HERE TO STAY

Corteva Agriscience is solely focused on agriculture and has made deliberate investments in R&D to ensure the highest levels of performance long into its future. We believe ag retail will remain an essential part of the ag business landscape for generations to come and Brevant seeds, through the retail route to market, poses a significant growth opportunity for the Corteva seed business. The performance you're already seeing from Brevant seeds is going to continue.

Maybe you want to see us prove it a little longer. That's fair. But believe us, it'll be better watching us prove it while selling our seeds than sitting on the sidelines.

¹Based on 18,024 multi-year, on-farm pre-commercial head-to-head comparisons, 3rd-party trials and on-farm trials within +/- 3 days of RM for Brevant® brand products vs. competitors. Multi-year and multi-location data are better predictors of future performance. Do not use these or any other data from a limited number of trials as a significant factor in product selection. Contact your local ag retailer for the latest and complete listing of traits and scores for the products provided subject to the terms and conditions of purchase which are part of the labeling and purchase documents.

²2020-2022 data from on-farm research locations across the U.S.; 6,321 comparisons within +/- 0.3 RM. Product performance is variable and subject to any number of environmental, disease and pest pressures. Individual results may vary from year to year. Multi-year and multi-location data are a better predictor of future performance. DO NOT USE THIS OR ANY OTHER DATA FROM A LIMITED NUMBER OF TRIALS AS A SIGNIFICANT FACTOR IN PRODUCT SELECTION.

³Brevant multi-year, on-farm pre-commercial head-to-head comparisons and third-party trials. Based on 25,886 comparisons within 2 days of relative maturity.
