

UNRIVALED WEED CONTROL

YOU EXPECT EXCELLENT YIELDS

from your soybean fields. We know that controlling tough weeds is critical to helping you do that. Enlist E3™ soybeans offer one of the most advanced trait technologies available, providing a new standard for weed control and yield potential.

Enlist™ Ahead

The Enlist Ahead management resource helps you get the best results from the Enlist system with:

- Tools and resources
- Education and training
- Exclusive rewards

Enlist E3 soybeans are tolerant to new 2,4-D choline, glyphosate and glufosinate.

ENLIST WEED CONTROL SYSTEM

As part of the Enlist weed control system, Brevant® brand soybeans with the Enlist E3® trait can be sprayed with Enlist herbicides for excellent weed control.

ENLIST DUO[®] HERBICIDE

Convenient blend of 2,4-D choline and glyphosate.

Two modes of action to deliver control and help prevent resistance in your fields.

ENLIST ONE[™] HERBICIDE

Straight goods 2,4-D choline with additional tank mix flexibility.

Ability to tank mix with glufosinate and other qualified herbicides, customizing the ratio of herbicides to match each farm's needs.

ENLIST DUO[®] AND ENLIST ONE[™] HERBICIDES

Near zero volatility: Up to 96% less volatile than 2,4-D ester.

Minimized potential for physical drift: The drift reduction from Colex-D technology combines with the low-drift nozzles for a 90% reduction in physical drift compared with traditional 2,4-D.

Additional peace of mind around neighboring crops with the on-target characteristics of Enlist herbicides.
